

Cgcircuit FIX

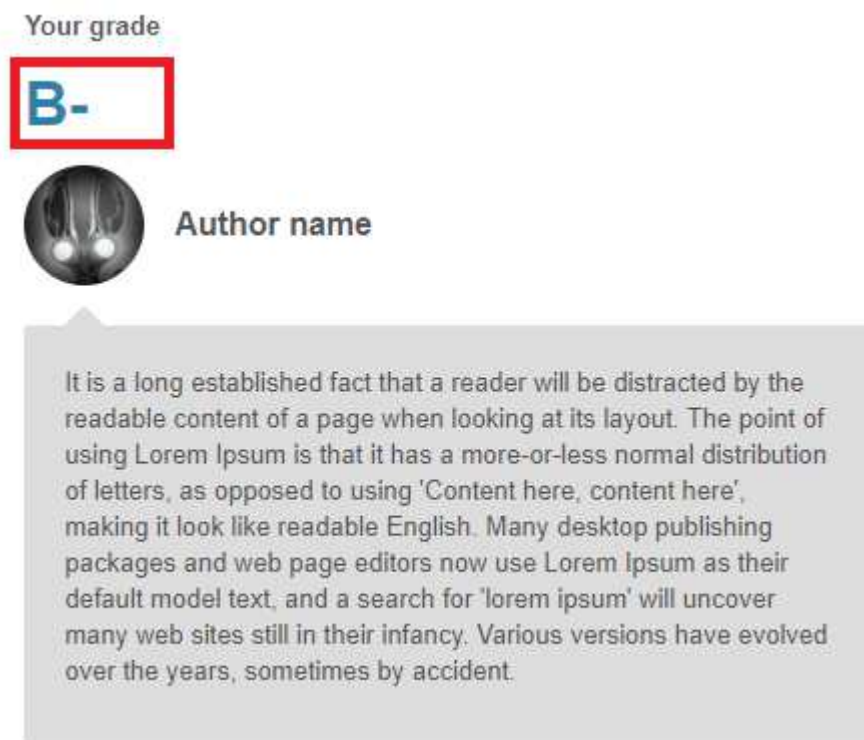

In general what needs to be fixed is the correspondence to the layout provided in the document. The elements are all there, but the arrangement must be as close as possible to the document, unless bootstrap itself allows you to do so.

Check the buttons as filling, color, position according to the document (some button (Some buttons must be outlined using the bootstrap class))

- Fix right alignment to player

- Align in the center with respect to image

- In the document is specified how the label should be (section Design note and view this link <https://bootswatch.com/cosmo/> to see the bootstrap alert to use)

The point of using Lorem Ipsum is that it has a more-or-less normal distribution of letters, as opposed to using 'Content here, content here', making it look like readable English. Many desktop publishing packages and web page editors now use Lorem Ipsum as their default model text, and a search for 'lorem ipsum' will uncover many web sites still in their infancy. Various versions have evolved over the years, sometimes by accident.</p>

- About player, do not use what is already on the page, simply insert the standard version of jwplayer as a player so that it fits exactly in that box.
- In the teach version, the arrangement of the elements is not aligned with that of the document and the label are different.
