VPN installation Instructions

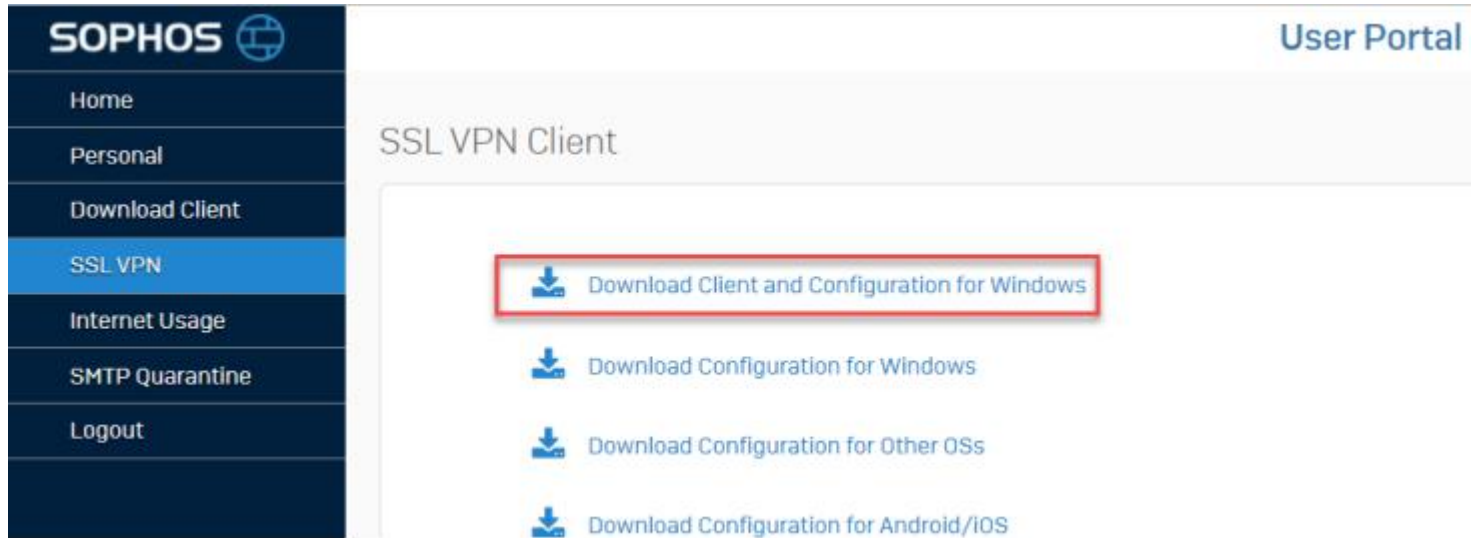

VPN Installation Instruction

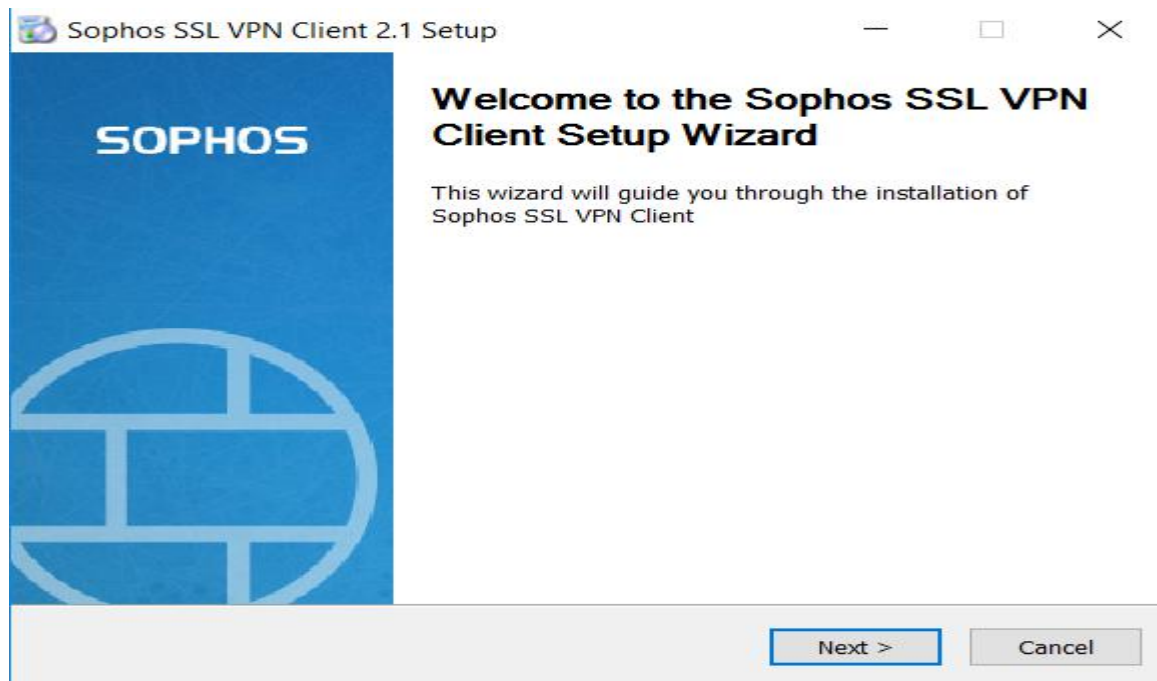

1. Open the link <https://14.142.27.154:8443/> in Internet Explorer.
2. Enter VPN user name and Password provided by the IT team.

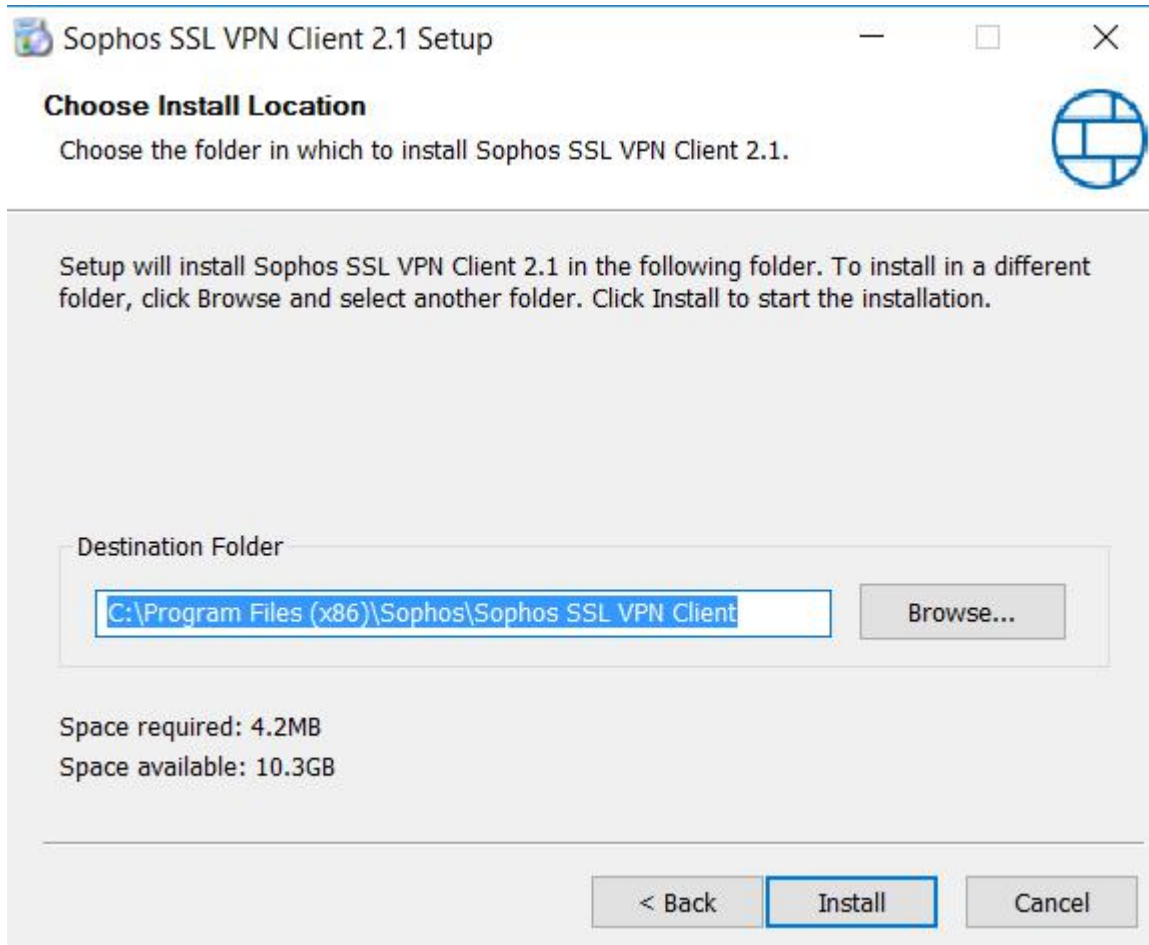

A screenshot of the Sophos User Portal login interface. The interface is split into two main sections. The left section has a dark blue background and contains the 'SOPHOS' logo with a globe icon. Below the logo are labels for 'Username' and 'Password'. The 'Username' field contains the text 'john.smith'. The 'Password' field is masked with eight dots. A blue 'Login' button is positioned below the password field. The right section has a lighter blue background and features the large text 'User Portal' at the top. Below the text is a faint, stylized graphic of two people's heads and shoulders.

- Go to SSL VPN Client tab. Download the installer specific to your windows OS

- Run the Setup file, please make sure you have administrator rights/installation privileges.

5. Login using SSL VPN context menu and credentials.

6. After successful login, open the remote desktop connection to the specific machine or access the website link provided by the team members.
